

3-4) (FIGS. 2-4) formed at the inner edge of the side panel. When installation of the side panels 26 is desired, the channel clip engages the welt in a releasable fashion. Formation of the sleeve 65 can be accomplished, for example, by wrapping a portion of the inner edge 29 of each side panel 26 around the core 63 and fastening adjacent surfaces of the inner edge portion to each other as at 64 with an adhesive. The adhesive contemplated by the present invention may be any suitable adhesive and may be sensitive to pressure or heat, or a combination thereof. Alternatively, the adhesive may be applied to fasten the inner edge 29 of the side panel 26 directly to the core 63.
